FuelMaster

FuelMaster

MasterSystem Technologies offers a full fuel management system covering all parameters of fuel usage and consumption, from when the fuel is delivered to how much is actually burned in a vehicle or plant. We provide the necessary tools to manage and bridge the gap between fuel suppliers and consumers.

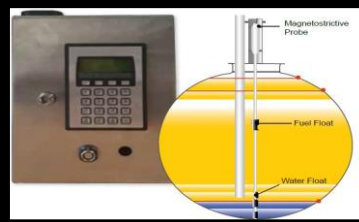

AUTOMATIC TANK GAUGING

- Automated volume, water, temperature and litre readings.
- ATG limits human intervention and irregular readings.

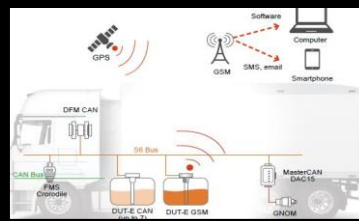

FUEL CONSUMPTION ANALYSIS

- MST has expanded to provide Clients with detailed consumption viewing of fuel.
- Enables geolocation of the vehicle / equipment at the time of consumption as well as driver information.

ST500 CONTROLLER

- The ST500 pump will automate recordings of transactional data by authorising vehicles / drivers / attendants / operators to dispense fuel.
- Transactions are posted online for live viewing.

IN VEHICLE FUEL MONITORING

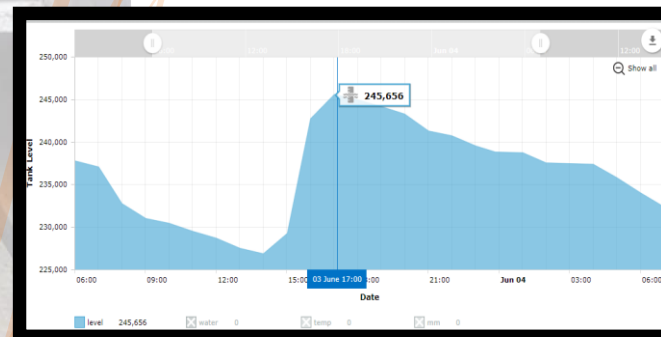

- In Vehicle Fuel Monitoring and Reporting.
- Clients can monitor on board fuel consumption on assets and machine.
- Fuel loss, refill and transfer monitoring and reporting as well as real time alerts.

Customisable Management Reports

Live In Vehicle Fuel Reporting for usage, refills and syphonings.

Historical Fuel Reporting for viewing refills, transfers and losses.

Site Reconciliations and Summary Reporting.

Date	Previous Day Closing Dip	Deliveries	Dispensing Pump 2	Theoretical Closing Bal	Dip Reading Tank 1	Daily Variance	Percentage Variance	Cumulative Variance
